

About US

Multi Manufacturing LLC was established in 2018 and is located near San Diego, in Vista California. Our vision, from the beginning, was to provide highly efficient, high quality HVAC products at an affordable price. We've traveled throughout the world, developed relationships with several manufacturing plants, invested in these companies and have designed many products that we're proud to put our name on. Our business philosophy is simple: Our success is solely dependent on our ability to contribute to our customers' success.

Engineering

We maintain a large-scale modern Enthalpy Difference Laboratory, built by the China Electrical Apparatus Research Institute, to ensure high quality product development and production. This laboratory is state of the art and was approved by Tianxiang Satellite Laboratory.

Manufacturing

All of our manufacturing plants carry ISO 9001: 2015 and adhere to strict manufacturing and quality practices. With our advanced production equipment, tooling and manufacturing processes, we are confident that our customers will be pleased with the quality and reliability of our products.

Sales and Support

We maintain a well-trained and knowledgeable customer service staff. Our professional rep network will assist in project design, technical troubleshooting and product support. We currently maintain finished goods inventory in our Ontario California warehouse and will be opening our Eastern Warehouse in Auburn Indiana. We also maintain a large parts stock in our Vista California warehouse.
