

SPV-HP

Single Package Vertical Heat Pump

R454b Refrigerant with Variable Capacity

High Efficient Single Package Vertical Unit, with Inverter Technology

3/4 Ton - 3 Ton, with Efficiencies up to 16.00 SEER2 and 11.0 EER2

R454b

The SPV-HP is a highly efficient Single Package Vertical unit that is designed as a better alternative for New Construction and Retrofit projects. With a compact design, the SPV can be installed in smaller areas, freeing up valuable floor space.

Typical installations for the SPV include:

- High Rise Apartments
- High Rise Condominiums
- Hotels
- Motels
- Independent Care Facilities
- Pre Manufactured Homes
- Modular Buildings
- Student Housing

Features

Highly Efficient / High Performance

- High Efficient Inverter Compressor, with Efficiencies up to 11.0 EER2
- High Performance EC Blower Motor, with Available ESP up to 0.50" WC
- DC Condenser Motor, with Low Amp Draw

Variable Capacity Performance

- Variable Capacity Design, allowing engineers to effectively design for heat loss.

Heating at Low Ambient Conditions

- Heat Pump Operation to 15° F
- Heat Strip Options Available for Colder Climates
- COP up to 3.7 @ 47° F

Easily Installed and Serviced

- Unit Slides into a Wall Sleeve that is installed on Rough-In
- Unit can be removed easily for service, by sliding it out of the Wall Sleeve
- Service Compartment is Accessible from the Inside-Front of the Unit

Fresh Air

- Fan-Assisted Fresh Air Package with damper is available.

Standard Innovative Design

- Refrigerant Service Ports
- Low Pressure Safety
- Corrosion Resistant Evaporator and Condenser Coils
- Foil-Face Insulation Lining in cabinet
- Gasketed Doors and Panels, to Comply with 2% Low Leak Requirements
- Compressor Blanket and Sound Attenuating Insulation in Compressor Compartment
- Environmentally Friendly R454b Refrigerant

Nomenclature

Wall sleeves can be used in either side or rear install application.

Standard WS wall sleeve features

- Heavy duty leveling legs with locking nuts
- Powder coated paint finish
- Foil face rubber insulation lining
- Pre-drilled holes on sides, for mounting to inside frame opening

The WS wall sleeve has a built in condensate drain pan. A 3/4" female pipe thread connection is provided in the bottom of the wall sleeve for field connection to a condensate riser. If the primary condensate drain becomes clogged, and the condensate drain overflows, water will flow toward the front of the sleeve to the exterior of the building.

SPV-HP

Architectural Outdoor Grilles

	Fits	Height	Width	Finish
OG-1A	9SPV - 1824SPV	44"	22"	Brushed Aluminum
OG-1P	9SPV - 1824SPV	44"	22"	Paint Ready Aluminum
OG-2A	25SPV - 3036SPV	51.5"	30"	Brushed Aluminum
OG-2P	25SPV - 3036SPV	51.5"	30"	Paint Ready Aluminum

OG Architectural Outdoor Grilles attach to the exterior of the Wall Sleeve, from the inside of the building, with the factory provided bolts.

The louver design allows condenser air to enter the lower portion of the grille and exit the upper portion of the grille.

Outdoor Grilles are available in either a brushed aluminum finish or a paint ready finish.

Dimensions shown are in inches

The wall access panels are mounted to an interior wall and provide service access to the equipment closet and provide return air filtration (-LA panels only).

Digital Wired Wall Controller

Features

- 3-Speed Fan Control
- 7-Day Programmable
- Dehumidification Mode
- Modern Touchscreen Design

	Fits	Height	Width	Depth
WWC-3	9SPV - 3036SPV	3.4"	3.4"	0.7"

The SPV-HP units have a factory standard control board, for use with a standard 24V thermostat or a wired wall controller. The WWC-3 wired wall controller is connected directly to the board, with a single plug, connected to a communication cable.

Digital 24V Programmable Thermostats

MMT4522-001

Features

- Remote indoor sensor input (all thermostats)
- Programmable or Non-Programmable
- 3 Levels of Keypad Lockout with PIN Access
- 2 Heat / 1 Cool Programmed for SPV-HP Units

Model	Fits	Height	Width	Depth
MMT4522-001	9SPV - 3036SPV	4.30"	5.70"	1.30"

The SPV-HP units have a factory standard control board, for use with the MMT thermostats or wired wall controllers.

2030

Features

- 7-Day, 5-2 Day Programmable or Non-Programmable
- 2 Heat / 1 Cool Programmed for SPV-HP Units
- SmartLimit Temperature Limits
- SpeedSet Programming Mode
- Installer Lock Mode

Model	Fits	Height	Width	Depth
2030	9SPV - 3036SPV	4.25"	5.12"	1.00"

Notes:

The MMT4522-001 and 2030 thermostats connect to the board with standard thermostat wire.

All MMT4522-001 and 2030 thermostats are factory configured as Non-Programmable, but can easily be modified in the field to a Programmable thermostat.

The thermostats wire from G (auto) on the board to the G terminal on the thermostat. The blower motor speed is controlled through the main control board.

Digital 24V Wireless Thermostats

Non-Programmable

Features

- Large LED Display with Blue Backlight
- Heating and Cooling Set Point Limits
- Separate Heating and Cooling Swing Cycle Rate Adjustment
- Battery or 24V Power

	Fits	Height	Width	Depth
MMW-1	9SPV - 3036SPV	3.9"	4.7"	1.1"

The MMW-1 includes a thermostat, thermostat sub base and a wireless receiver. The wireless receiver connects to the 24V Board in the SPV-HP unit and will mount inside of the unit cabinet.

Please refer to the MMW-1 Installation, Operation and Maintenance Instructions for additional information.

Adjustable Fresh Air for Balance Ventilation

All SPV-HP-F-D Models

Controller Setting	CFM
11%	8
20%	18
30%	35
40%	49
50%	57
60%	72
70%	84
80%	99
90%	111
100%	123

Features

- On / Off Fresh Air Fan Switch
- Dial for 0 - 100% Fan Speed Control
- Large Liquid Crystal Display
- Lock Set Function
- Outside Air Range from 8 - 123 CFM

Motorized Fresh Air Damper

25CH001

The 25CH001 Motorized Air Damper is available as a factory installed option on all SPV-HP-D units, with the "-F" Fresh Air option. This motorized damper will open when the fresh air fan is in operation, and will close when the fresh air fan is not operating.
